

The Clear Choice
Water Filtration Systems

www.aquafilter.com

A	Filter faucet
B	Filter head
C	Filter housing
D	Faucet adapter with sliding valve FXFMP
E	Universal adapter
F	Faucet sink
G	Sediment filter FXO-80L*

* Applies to model FHCTF-1

Technical specifications

Dimensions (Height x Diameter): 330 mm x 115 mm
Faucet adapter: 1/2"
Working Temp.: 2°C - 23°C (35°F - 73.4°F)

Installation

1. Prior to installation, check if all filter components are firmly tightened. Insert filter faucet (A) into the elbow of the filter head (B).
2. Remove any end pieces from the sink faucet (F), e.g. a faucet strainer.
3. If your sink faucet is threaded on the outside (standard "male" type thread 7/8"), mount filter connector using a rubber O-ring.
4. If your sink faucet is not threaded or the thread is non-standard, use a faucet adapter (FXFMP) first. Mount it to your sink faucet and then install the filter connector (as in step 3).

Cartridge replacement

1. Shut off water supply valve.
2. Unscrew the filter housing by hand or by using a universal filter wrench (FXWR1-BL) from the filter head and remove used cartridge.
3. Wash the inside of filter housing thoroughly with warm water.
4. Remove protective foil from replacement cartridge.
5. Grease rubber O-ring with technical vaseline.
6. Place replacement cartridge inside the filter housing (ensure to place it polypropylene fiber side up).
7. Ensure proper position of the rubber O-ring of cartridge and the filter housing.
8. Screw by hand filter housing with the filter head. To prevent damage to the thread or O-ring, be sure not to over tighten.

FXO-80L* sediment stainless steel net cartridge removes large sediment particles. Cartridge may be reused after washing with running water.

Cartridge must be replaced every 3 months or after filtering 3000 liters of water. In case of water pressure drop or water quality decrease, early cartridge replacement may be necessary.

* Applies to model FHCTF-1
